The portfolio is positioned to take advantage of movements in spreads or rates. With a healthy 12% cash pile, the Fund can take advantage of any changes. Over time the cash balance will be reinvested. Cash also protects the portfolio at a time of uncertainty. Fixed rates have backed up some 20bp and the portfolio has benefitted as a significant portion has not been affected by the increase. An increase also benefits the floating portion of the portfolio and should be reflected by a slight increase in coupons once the bonds reset at the higher levels.
